---

Jack

As discussed during the call yesterday, we would like the land-based and shipboard test reports submitted to the USCG as part of the AMS acceptance package for the following BWMS:

- Aquarius® - EC (manufactured by Wartsila)
- Bawat™ BWMS (manufactured by Bawat A/S)
- BioViolet (manufactured by Kwang San CO., Ltd)
- Coldharbour GLD™ Ballast Water Management System (manufactured by Coldharbour Marine Limited)
- PureBallast 2.0 (previous response from USCG had the initial system and 3.0 but not 2.0 version) (manufactured by Alfa Laval)
- SKY-SYSTEM® Ballast Water Management System (manufactured by Nippon Yuka Kogyo Co.)

The land-based and shipboard test reports should include the data showing the discharge standards were achieved. If EPA wants ERG to evaluate the quality of the testing, the QAPPs may also be requested. In previous AMS submittals to the USCG, the names of the reports and actual reports submitted varied, so all reports may not be available for these BWMS.

Please contact me if any further information is needed.

Kind regards,

Debra
